Update to Shopping Favorites

Favorites have been updated to be more user-friendly and intuitive. These changes include:

- Ability to search Shopping Favorites (across multiple folder names and all items)
- Import/Export Feature
- New streamlined drop-down menu for access to Personal and Shared Favorites
- Updated layouts to pop-up windows for actions such as creating new favorite folders
- Required fields marked with “*” for easier identification
- A “Display Items No Longer Available” checkbox has been added to folders to allow the folder to display items that have been marked for deletion, disabled, inactive, etc. (Hosted Catalog items that have been added)
